

The Motorman His Duties A Handbook of Theory Practice for Operating Electric Cars

By Ludwig Gutmann

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1899 edition. Excerpt: . . . the armature may be. For instance, assuming the brushes D, Di stationary and the armature turning; if the armature has turned so far around that segment 2 would be under the brush D, then segment 6 would be under brush Di. The current would go to the armature winding through b and leave it by way of f. In this way each one of the segments and connecting wires has to perform in succession its work. The current in going around the core makes a magnet out of the iron, as indicated by the letters N, S. For the sake of convenience in understanding, the armature core may be also considered divided into two half rings, as in Fig. 44, the upper and the lower; then the current flowing around the upper half makes it a magnet, and simi FIG. 44. larly the current...
