## ENERGY EFFICIENCY IN ELECTRIC STEELMAKING

By Joana Tarrés Font

Shaker Verlag Feb 2014, 2014. Buch. Book Condition: Neu. 21x14.8x cm. Neuware - Steel production is a significant energy consumer. The iron and steel sector consumes 19% of the total energy consumed in industry and is the main industry consumer in Europe. Energy consumption by steel plants in Luxembourg represented 22% of the final industry energy consumption in 2007. In recent years this industry has undertaken efforts to increase energy efficiency by reducing its consumption and recovering otherwise lost heat, as state of the art research shows. Moreover, the recent European Directive 2012/27/EU on energy efficiency is promoting efficient energy supply, considering the use of waste heat for district heating and cooling. This thesis was framed in this context and its objective was to develop strategies for saving and, in particular, recovering energy in an electric steel plant. Approximately thirty options were technically and economically evaluated. In addition, a risk assessment matrix was developed to assess the technical and economic risk of each option. After a thorough energy audit, the energy consumption of the plant was established and the main waste heat sources available for heat recovery as well as the energy savings possibilities were identified. The potential energy savings...

### Reviews

*Without doubt, this is the very best job by any article writer. It typically does not cost too much. You are going to like just how the blogger write this pdf.*

-- **Jazmyn Beier II**

*This book can be worth a read through, and far better than other. It can be writter in easy phrases instead of confusing. You will not really feel monotony at at any moment of your respective time (that's what catalogs are for concerning if you check with me).*
