MAGNETIC CURRENT

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 74 pages. Dimensions: 7.8in. x 5.3in. x 0.6in. Magnetic Current by Edward Leedskalnin was known as an important engineer who with a fourth grade education wrote major works on his theories of magnetism. Magnetic Current is one of his better known works and is still used widely by classes studying magnets, magnetic currents and magnetic poles. This work is still used widely today in science classes, engineering students and by individuals learning scientific trades. English was not Leedskalnin's native tongue, and that does show in this book. Leedskalnin was somewhat secretive, claiming to know how the pyramids were built and also to know the secrets of anti-gravity. He proved the latter, by building Coral Castle near Homestead, Florida by lifting numerous large blocks (up to 30 tons) without modern machinery. Despite his lack of flare and articulate speech, Edward Leedskalnin definitely had an immense understanding of energy and magnetism. Leedskalnin doesn't reach any conclusions in Magnetic Current. However, he does press upon the reader to understand his principles so that you may form a strong foundation and understanding of magnetism and even vibration. This item ships from La Vergne, TN. Paperback.
