Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Fruit Culture: Sour Orange Stock; Fertilizing and Methods of Compounding Fertilizers, Injurious Insect Pests, Parasites, and Observations I visited all the largest fruit districts of Maryland, Delaware, and New Jersey, and found that the peach crop for this year will be almost an entire failure, owing to the heavy March frosts, which destroyed the crops. What fruit was not destroyed is much below the average in quality. This has been a very heavy loss to the eastern peach growers, and has driven many of them out of the business. The trees will have to be cultivated for a year without any production or profit, and the cultivation is very expensive, as commercial fertilizers have to be applied even for the growth of wood. A crop cannot be grown without fertilizers, nor can the trees produce fruit buds for the coming year without it. There is practically no peach crop in the East anywhere, and it will be difficult to supply the demand of the markets with California fruit this year. The cherry orchards in many districts were full of fruit, but the curculio had stung nearly every fruit, and, in fact, it was with great difficulty that any cherries were found that did not contain from two to eight holes in them. These holes are of a crescent shape, the work of the curculio beetle. The plum crop is also damaged by the curculio, and, in fact, very little effort is made, on this account, in their culture. The apricot is not grown for the reason that the fruit is also destroyed by the curculio, and the climate is not suitable for its growth. The...
