EVERYMAN CHESS, United Kingdom, 2014. Paperback. Book Condition: New. Workbook. 229 x 152 mm. Language: English . Brand New Book. Experts agree that regularly solving tactics is a vital component of chess training. However, it s also widely acknowledged that there is one drawback of traditional chess puzzles - when solving them students know for sure that there is a genuine tactic in the position, whereas during a real game there is no such guarantee. In this workbook, Volker Schleputz and Grandmaster John Emms offer a unique framework to study chess tactics independent of themes, difficulty and - most importantly - even the existence of an actual tactic in a given position. Analysing carefully selected games, from beginner level through to club and tournament level, the reader assumes the role of a tactics detective, checking for mistakes and missed opportunities by both sides without the help of a chess engine. This training method resembles live play far more realistically than solving puzzles, because each move has to be analysed with respect to tactical possibilities - whether they exist or not. The same thinking processes used in the training can then be applied in real games. *A unique framework to practise chess tactics *Exercises resemble over-the-board situations *Ideal for beginners, intermediate and club players.
