Excerpt: . . . 1906 No. 7 THIS SOCIETY DOES NOT HOLD ITSELF RESPONSIBLE FOR THE OPINIONS OF ITS MEMBERS. COKE OVEN CONSTRUCTION. W. M. JUDD. Member. In the limited time available this evening, it is possible only to give a brief description of coke oven construction as carried on at the present time, further limiting this description to the common or bee-hive type of oven. As the necessity for using coke obtained from bituminous coal was forced upon the iron manufacturers by the disappearance of the forests from which their supply of charcoal was obtained, it was natural that the method of its manufacture should have been evolved from the methods previously used in making charcoal. Thus probably the first coke in any quantity was burned from coal piled in heaps on level ground, with suitable flues through the piles built of lumps of coal, refuse coke and slabs of wood for igniting the coal and regulating the supply of air, the whole banked with earth. I have seen a fair quality of coke produced in this way not more than six years ago. Meeting of Structural Section, September 2, 1906. W. G. Wilkins Co., Westinghouse Building, Pittsburgh, Pa. A small separate kiln built entirely of brick was the next step in advance, and from these separate kilns, by the grouping of the kilns in single or double lines, covering the brick work with earth to retain the heat and building masonry retaining walls...
